\$229.95**

- GMAX introduces the functional system helmet designed for maximum comfort and unparalleled function.
- Chin bar section lifts clearly away from the shell allowing comfortable conversation, refreshments etc. without a person having to remove the helmet.
- Anti-fog breath guard snaps into position on the chin bar, the chin bar pivot design allows the breath guard to stay in position on the chin bar piece when it is raised, therefore the breath guard does not require removal when the chin bar is lifted because the breath guard is lifted away from the face with the chin bar unlike competitor helmets.

- D.E.V.S. (dual exhaust venting system) top, side and rear vents reduce fogging and sweating by allowing hot air to escape from the mouth area, and the top and rear of the head.
- Forehead and chin bar vents control refreshing intake air and reduce shield fogging.
- One hand easy to use chin bar push to open mechanism, designed for easy use with snowmobile gloves.
- Excellent shield seal reduces unwanted cold air and noise.
- State of the art anti-fog coated double lens standard or electric shield. Single lens available for motorcycle use.
- Protective aesthetic lower rubber molding around bottom of the complete helmet including the chin bar.
- GMAX deluxe North American sizing, XS-XXXL. Removeable adjustable cheek pads for custom fitting.
- Snap in removable chin curtain.
- Rear neck curtain for added warmth and quiet.
- Padded chin strap.
- Deluxe ear pocket for better fit and speaker installation.
- Inner chin bar designed for microphone installation.
- DOT approved.
